

**M O O N**

... The leading edge in music & film reproduction

**FOR IMMEDIATE RELEASE - May 29, 2003**

**Simaudio Ltd.** proudly announces the introduction of the **MOON Equinox CD Player**, our newest addition to the **MOON Audio Reference series** of audio components. Based on the aesthetics of the well-established MOON Eclipse CD Player and the audio circuitry of both the MOON Nova CD Player and MOON Orion DVD Player, the **MOON Equinox** delivers "audiophile" performance in a very affordable package. Intended as a source companion to the MOON i-3 integrated amplifier, the **MOON Equinox** represents one of the very finest affordable digital components for the new millenium.

**Significant Design Features:**

- Separate digital & analog power supplies with seven stages of voltage regulation.
- Philips-based transport mechanism with in-house developed software.
- BurrBrown BB1730E 24-bit/96-kHz DACs and 8X oversampling digital filter.
- Internal upsampling which achieves 24-bit/352.8kHz resolution.
- Capacitor-free signal path using a DC servo circuit.
- Proprietary 6dB/octave analog filter identical to the circuit found in the Eclipse.
- Accurate 25ppm digital clocking system for exceptionally low intrinsic jitter levels.
- Low impedance analog output for easy system component matching.
- Short signal paths to eliminate any potential for interference and sonic degradation.
- Pure copper circuit board tracings with low impedance characteristics.
- Accurate matching of the finest high quality electronic components.
- Repeat function for entire disc, single track and programmed track selections.
- Program, Scan and Random play modes.
