

MOON

... The leading edge in music & film reproduction

*"Over **25** Years of Excellence"*

FOR IMMEDIATE RELEASE - September 4, 2008

Simaudio Ltd. proudly introduces the **MOON HDS-8 HDMI Switcher**, one of our new additions to the **MOON Evolution series**. The **HDS-8** is the perfect companion for the CP-8 Preamplifier/Processor in applications where there are numerous video source components utilizing HDMI connectivity. Providing 5 inputs and remote control operation, the **MOON HDS-8** is the very finest HDMI switcher available today, yielding absolutely no measureable or visible signal loss.

MOON HDS-8 Significant Design Features:

- HDMI Version 1.3a.
- Supports all available interlaced and progressive scan video resolutions.
- Backward compatible with DVI-D input signal format.
- Deep Color support.
- Full 6.75 Gbps data transfer rate.
- Auto Standby mode when no HDTV video output is detected.
- RS-232 port for full custom external control.
- 12 Volt trigger input & output for remote operation.

MSRP \$2,000.00 USD / Availability – October 2008
