

MOON

... The leading edge in music & film reproduction

## FOR IMMEDIATE RELEASE - June 1, 2006

**Simaudio Ltd.** proudly introduces the **MOON LP 5.3 Phono Preamp**, our newest addition to the **MOON Classic series** of audio components. **The LP 5.3** offers extensive flexibility through various end-user adjustments that optimize its use with virtually any phono cartridge available today. As well, we've taken extreme design measures to reduce the noise floor while maintaining a very open, neutral and natural sound. Simply put, the **LP 5.3** delivers "audiophile" performance in a simple yet elegant and affordable package. Over twenty-five years of experience in the design and manufacturing of high-performance audio components have paved the way for the **MOON LP 5.3**.

*"Over **25** Years of Excellence"*

### **MOON LP 5.3 Significant Design Features:**

- End-user adjustable impedance loading (10, 100, 470, 1K and 47kΩ)
- End-user adjustable capacitance loading (0, 100 and 470pF)
- End-user adjustable gain settings for moving magnet (40dB) and moving coil cartridges (54, 60 and 66dB)
- Selectable equalization curves for both the RIAA and the IEC standards
- Large isolated power supply on a separate circuit board with 2 stages of voltage regulation
- Optional external power supply upgrade
- Single-ended RCA and Balanced XLR outputs
- Four-layer PCB tracings with dedicated ground and power planes using pure copper for low impedance characteristics. The advantages include better circuit layouts resulting in a much shorter signal path and a vastly improved signal-to-noise ratio.
- Power supply voltage regulation incorporates *Evolution Series i<sup>2</sup>DCf* (Independent Inductive DC Filtering); 1 inductor for each and every IC in the audio circuit's signal path – 2 stages in all.
- Extremely short signal path for a faster transient response.
- Accurate matching of the finest high quality electronic components.
- Low operating temperature for a longer than normal life expectancy.
