

MOON

THE ART OF TECHNOLOGY

FOR IMMEDIATE RELEASE - October 2, 2002

Simaudio Ltd. proudly announces the introduction of the new MOON Orion DVD Transport/Player, our newest addition to the MOON A/V series of Home Theater components. Based on the highly acclaimed MOON Stellar DVD Player and employing a fully modular design concept, the MOON Orion is being offered as a stand-alone transport with an optional Digital-to-Analog audio circuit and/or optional Videon Stingray line-doubler circuit using Faroudja's DCDi™ (Diagonal Correlation Deinterlacing) technology. Both of these options will be available at either the time of purchase or as an "in-the-field" upgrade.

Significant Design Features:

- Optional Videon 'Stingray' line-doubler circuit using Faroudja DCDi™ Technology.
- Optional BurrBrown PCM1730E 24-bit/192-kHz DAC's with 8X oversampling digital filter for two-channel analog audio output.
- 10-bit oversampled video circuitry with active current-to-voltage converter.
- Philips ASD1 High-performance transport mechanism with dual-laser pickup.
- SRS Labs TruSurround™ 3D surround for 2-channel audio output.
- Full array of connectors including S/PDIF, RCA & TosLink for audio; Composite RCA, Component RCA, S-Video, Progressive BNC & RGB (DB15) and 21-pin SCART for video.
- Compatible with DVD, CD Audio, Video CD, CD-R and CD-RW media formats.
- Full-function RS-232 port control and status for custom integration or automation.
- Support of both NTSC and PAL video formats.
- Support for all audio formats (i.e. Linear PCM, MPEG, Dolby, DTS, etc.)
- "Rack mount ready" faceplate with stylish removeable aluminum cheeks.
