

M O O N

Power.

Emotion.

Soul.

FOR IMMEDIATE RELEASE - January 7, 2009

Simaudio Ltd. proudly introduces the MOON PSX5.3 Power Supply, one of our newest additions to the MOON series of audio components. The PSX5.3 dedicated external power supply for the MOON LP5.3 Phono Preamp brings this award winning phono stage to an extraordinary level of performance far beyond the competition and unmatched at this price; Reference level analog LP playback just became even more affordable. The PSX5.3, housed in a chassis identical to the LP5.3, features a special "pi-type" filter and a dual voltage regulation system that reduces the LP5.3's already very low noise level on the DC signal by a mind-numbing 150dB.

Some of the benefits that the MOON PSX5.3 brings to the LP5.3's already astonishing sonics are an even better signal-to-noise ratio that leaves you with the impression of increased gain; more realistic rhythm and pace; more natural life-like high-frequencies that allow you to better differentiate between various cymbals in a recording; and a deeper blacker background. Thirty years of experience in the design and manufacturing of award winning high-performance components has paved the way for the new MOON PSX5.3.

"Celebrating 30 Years of Excellence"

MOON PSX5.3 Significant Design Features:

- High quality toroidal transformer
- 4 stages of DC voltage regulation
- Total capacitance of 35,200uF
- Dual choke inductance (2x 200mH)
- Special "pi-type" filter after initial voltage rectification stage to reduce AC transmission noise
- Dual action voltage regulation system to further lower noise
- DC signal noise is 150dB lower within LP5.3 circuitry
- Pure copper circuit board tracings with extremely low impedance characteristics
- Accurate matching of the finest high quality electronic components
- Designed to be powered up at all times for optimal performance
- Low operating temperature for a longer than normal life expectancy.

The MOON PSX5.3 will have an MSRP \$1,250.00 USD

Simaudio Ltd. has been designing and manufacturing innovative, leading-edge audio and video products since 1980. MOON products have been globally recognized for their world-class performance, garnering numerous accolades for this outstanding achievement. Our products are engineered and built in Canada, utilizing advanced, efficient, "green" assembly techniques with strict quality control. Furthermore, our manufacturing processes are part of our philosophy, whereas the high quality and long-life of MOON products are the best way to preserve our environment, avoiding premature obsolescence. MOON products meet or exceed all international requirements for safety, performance and durability. At Simaudio, great music matters. However, great music for a lifetime matters most.
