

# MOON

THE ART OF TECHNOLOGY

FOR IMMEDIATE RELEASE - November 8, 2001

**Simaudio Ltd.** proudly announces the introduction of the **MOON Stellar DVD Player**, our newest addition to the **MOON A/V series** of Home Theater components. Based on a complete in-house R&D effort, the **Stellar** is the ultimate source component for the true "videophile". Using a non-compromising design approach, we've left no stone unturned in offering a true state-of-the-art DVD Player. With the goal of offering the very best possible video quality, an optional line doubler circuit using Faroudja's DCDi™ (Diagonal Correlation Deinterlacing) technology is being made available at both the time of purchase and as a factory upgrade.

### **Significant Design Features:**

- Optional Videon 'Stingray' line doubler circuit using Faroudja DCDi™ Technology including both an adjustable image enhancer and animation mode setting.
- 10-bit oversampled video circuitry with active current-to-voltage converter.
- SRS Labs TruSurround™ 3D surround for 2 channel audio output.
- Crystal CS43122 24-bit/192-kHz DAC for digital audio processing.
- Full array of connection formats including RCA, XLR, BNC & TosLink for audio and Composite RCA, S-Video, Component BNC, RGB (DB15) & SCART (21-pin) for video.
- Compatible with DVD, CD Audio, Video CD, CD-R and CD-RW media formats.
- Bi-directional RS-232 port control and status for custom integration or automation.
- Support of both NTSC and PAL video formats.
- Available audio formats include MPEG1 (VCD), MPEG2 (DVDS), Linear PCM Audio, Dolby Digital® 5.1 (AC-3) and DTS Digital Surround 5.1™.
- Optional rack mounting available from 'Middle Atlantic Products'.
