

MOON i.5 Integrated Amplifier

Also available with black faceplate

The **MOON i.5** Integrated Amplifier offers immense value, delivering unrivaled performance in a distinctive package. Designed with numerous convenient features such as a front-mounted mini-jack for personal media players, the **i.5** produces music like no other integrated amplifier in its class.

Sophisticated ...

Musical ...

Incorporating technologies found in our highly acclaimed MOON Amplifiers and Preamplifiers, the **MOON i.5** Integrated Amplifier is the perfect companion for the CD.5 Disc Player, providing for many years of listening pleasure and hassle-free use. Thirty years of experience in the design and manufacturing of award winning high-performance components has paved the way for the **MOON i.5**.

Significant Design Features:

- An oversized power supply using a custom toroidal transformer design
- Rated output of 40 watts/channel into 8 ohms and 80 watts/channel into 4 ohms
- 6 line-level inputs including a front-mounted 1/8" mini-jack for personal media players
- Headphone output on 1/4" TRS jack located on the front panel
- Remote control operation
- Class A output to 5 watts for greater efficiency
- PCB w/ pure copper tracings & gold plating that yields low impedance characteristics
- Heat-sink free design incorporating an all-aluminum chassis for evenly distributed heat dissipation
- Rigid chassis construction to minimize the effects of external vibrations
- Optimized selection of very high quality electronic components
- Designed to be powered up at all times for optimal performance
- Low operating temperature to ensure a longer than normal life expectancy.
